

## Lock Box Placement for my \_\_\_\_\_ inch wide gate

Small powder coated screws are on 1 side of your gate. We need to know which side you want your hinges, Lock Box and screws showing. Circle only 1 of the 4 options below for each gate that you're ordering with a Lock Box. Print multiple copies for extra gates.

**Gates with Lock Boxes can only swing 1 way, outward from the hinge side. The blue arrow shows the trajectory of the gate when opening.**
